

## AMENDMENT

Kindly amend the application, without prejudice, without admission, without surrender of subject matter, and without any intention of creating any estoppel as to equivalents.

**IN THE CLAIMS:**

Kindly amend the claims, without prejudice, without admission, without surrender of subject matter, and without any intention of creating any estoppel as to equivalents, to read as follows:

1. (Currently Amended) A composition comprising
  - i) a sulphamate compound having a sulphamate group; the formula

wherein each of R<sub>1</sub> and R<sub>2</sub> is independently selected from H or a hydrocarbyl group, and wherein an (oxy)hydrocarbyl group is attached to the 2 position of the A ring of the steroidal structure; and

- ii) an apoptosis inducer;

inducer is a tumour necrosis factor-related apoptosis inducing ligand that binds to TRAIL R1 or TRAIL R2.

- 2-4. (Canceled)

5. (Previously Presented) The composition according to claim 1, wherein the ligand is TRAIL/Apo-2L.

6. (Previously Presented) The composition according to claim 1, wherein the apoptosis inducer is capable of interacting with a tumour necrosis factor-related apoptosis inducing ligand receptor.

7-18. (Canceled)

19. (Currently Amended) The composition according to claim [[14]] 1, wherein the (oxy)hydrocarbyl group is a group of the formula  $C_{1-6}O$ .

20. (Original) The composition according to claim 19, wherein the group of the formula  $C_{1-6}O$  is a methoxy group.

21. (Original) The composition according to claim 1, wherein the sulphamate compound is 2-methoxyoestrone-3-O-sulphamate.

22. (Currently Amended) The composition according to claim [[14]] 1, wherein the hydrocarbyl group is a group of the formula  $C_{1-6}$ .

23. (Original) The composition according to claim 22, wherein the group of the formula  $C_{1-6}$  is an ethyl group

24. (Original) The composition according to claim 1, wherein the sulphamate compound is 2-ethyloestrone-3-O-sulphamate.

25. (Cancelled)

26. (Original) The composition according to claim 1, wherein the sulphamate compound is an inhibitor of oestrone sulphatase (E.C. 3.1.6.2).

27. (Original) The composition according to claim 1, wherein if the sulphamate group of the sulphamate compound were to be replaced with a sulphate group to form a sulphate compound, then the sulphate compound would be hydrolysable by a steroid sulphatase enzyme (E.C.3.1.6.2).

28. (Original) The composition according to claim 1, wherein if the sulphamate group of the sulphamate compound were to be replaced with a sulphate group to form a sulphate compound, and the sulphate compound were incubated with a steroid sulphatase enzyme (E.C.3.1.6.2) at pH 7.4 and 37°C, it would provide a  $K_m$  value of less than 50 mM.

29. (Original) The composition according to claim 1, wherein if the sulphamate group of the sulphamate compound were to be replaced with a sulphate group to form a sulphate compound, and the sulphate compound were incubated with a steroid sulphatase enzyme (E.C.3.1.6.2) at pH 7.4 and 37°C, it would provide a  $K_m$  value of less than 50  $\mu$ M.

30. (Original) The composition according to claim 1, wherein the sulphamate compound comprises at least two sulphamate groups.

31. (Cancelled)

32. (Original) The composition according to claim 1, wherein the composition further comprises a pharmaceutically acceptable carrier, diluent, or excipient.

33. (Withdrawn) A method of preventing or inhibiting growth of tumour cells comprising contacting the tumour cells with the composition of claim 1.

34. (Withdrawn) A method of inducing apoptosis of a cell comprising contacting the cell with the composition of claim 1.

35. (Withdrawn) A method of activating a caspase comprising contacting a cell comprising caspase with the composition of claim 1.

36. (Withdrawn) The method according to claim 35, wherein the caspase is caspase 3.

37-40. (Canceled)

41. (Withdrawn) A method of treatment comprising administering to a subject in need of treatment the composition according to claim 1.

42. (Withdrawn) The method of claim 41, wherein the treatment is of cancer.

43. (Withdrawn) A method of treatment comprising inducing apoptosis by administering, to a subject in need of treatment, the composition according to claim 1 or a sulphamate compound.

44. (New) A composition according to claim 1 wherein the sulphamate compound has the formula

45. (New) A composition according to claim 1 wherein the sulphamate compound has the formula
